

Vadym Topchieiev

Senior Front-End Engineer | React / TypeScript / Next.js

Ukraine (EET/EEST) | Remote / Contract / Full-time | v.topcheev@gmail.com | linkedin.com/in/topvv

PROFESSIONAL SUMMARY

- Senior Front-End Engineer with 5+ years of experience building production-facing React and TypeScript web applications for marketplace, telecom analytics, FinTech and workflow-heavy product environments.
- Strong in frontend architecture, complex UI state, API integration, performance tuning, testing, code quality and cross-functional delivery with product, design, backend and QA teams.
- Recent experience includes telecom analytics platforms and automotive marketplace features: homepage experiences, returning-user modules, experimentation/MVT, tracking, SSR/data orchestration, release support and production issue investigation.

SELECTED IMPACT

- Contributed to production-facing homepage and returning-user experience features for a large-scale automotive marketplace, including carousels, recently searched/contacted flows, price drops, tracking and MVT/experimentation.
- Built analytics dashboards and workflow-heavy interfaces for telecom marketing and segmentation use cases.
- Improved frontend performance by reducing unnecessary re-renders, refining state structure and tightening component boundaries.
- Integrated REST APIs, WebSocket streams and data orchestration layers with loading states, edge cases and production fallbacks.
- Supported stage/prod validation, release coordination, production issue investigation and rollback-related work.

TECHNICAL SKILLS

Core: React, TypeScript, Next.js, Remix, JavaScript

Product Engineering: frontend architecture, performance tuning, SSR/data orchestration, tracking/analytics, MVT/experimentation

State & Data: React Query, Zustand, Redux Toolkit, React Hook Form, REST APIs, WebSocket

UI Engineering: Material UI, Storybook, reusable UI systems, component-driven development, responsive web applications

Quality: Jest, React Testing Library, Cypress, code reviews, performance-oriented and maintainable frontend code

Tools: Git, Docker, Postman, Jira, Agile/Scrum/Kanban

PROFESSIONAL EXPERIENCE

SoftServe — Senior Front-End Engineer | Sep 2025 - Present | Remote, Ukraine

Client/Product: CarGurus — large-scale automotive marketplace product

Tech: React, TypeScript, JavaScript, Next.js, Remix, SSR, REST APIs, tracking/analytics, Storybook

Scope: homepage, search/discovery and returning-user experience initiatives in a large product environment.

- Built and improved homepage and returning-user experience features, including carousels, recently searched/contacted flows, price drops and product content blocks.
- Contributed to redesign and MVT/experimentation initiatives, aligning implementation with Figma, product requirements and tracking/analytics needs.
- Integrated frontend features with backend APIs and orchestration layers, handling loading states, edge cases, fallbacks and production data inconsistencies.
- Supported SSR/proxy-related frontend changes and cleanup around page rendering and data delivery.
- Improved UI reliability and release quality through defensive rendering, reusable components, skeleton states, cross-team reviews, stage/prod validation and production issue investigation.

Kyivstar.Tech — Senior Front-End Engineer | Jul 2024 - Sep 2025 | Remote, Ukraine

Client/Product: ADWISOR — analytics and marketing segmentation platform for telecom users

Tech: React, TypeScript, Zustand, React Hook Form, React Query, WebSocket, Material UI, Jest/RTL

- Built analytics dashboards and workflow-heavy interfaces for telecom marketing and segmentation use cases.
- Integrated REST APIs and WebSocket streams for near-real-time metrics and frequent data updates without UI stalls.
- Improved UI performance by reducing unnecessary re-renders, refining state structure and tightening component boundaries.
- Built form flows with validation, predictable state transitions and reusable form patterns using React Hook Form and Zustand.
- Collaborated with design, backend and data teams on feature breakdowns, edge cases and delivery planning.

Ralabs — Frontend Web Developer | Apr 2022 - Jun 2024 | Remote, Ukraine

Projects: Data Science IDE, FinTech Investment Platform

Tech: React, TypeScript, Zustand, React Query, Storybook, Jest/RTL, Cypress

- Built interactive React/TypeScript interfaces, diagram-based screens and complex user flows.
- Shipped onboarding and investment workflows for a UK product startup and maintained shared UI components in Storybook.
- Improved frontend maintainability by consolidating duplicated patterns into reusable hooks and components.
- Covered critical interactions with unit, integration and E2E tests; improved FE/BE error handling and PR consistency.

EARLIER EXPERIENCE

SoftServe — Frontend Engineer | Apr 2021 - Apr 2022

Tech: React, TypeScript, Storybook, Jest/RTL

- Developed composable and themeable UI components; refactored legacy UI library parts and added targeted tests around high-risk components.

Incode Group — Frontend Engineer | Dec 2020 - Apr 2021

Tech: JavaScript, React, HTML/CSS, Git

- Delivered UI features and bug fixes in a PR-based workflow; worked with REST endpoints, UI state and edge-case handling.

SoftServe — JavaScript Developer | Apr 2020 - Dec 2020

Tech: React, Next.js, Redux, TypeScript, Jest

- Delivered React/Next.js features with Redux-based state management; fixed production bugs and expanded unit test coverage.
